

Stephanie Di Vito

Federal Aviation Administration

Stephanie DiVito is a Research Meteorologist for the Federal Aviation Administration at the William J Hughes Technical Center in Atlantic City, New Jersey. She supports the Aviation Research Division Aircraft Icing Research Program in various icing related topics and manages FAA icing weather projects related to the diagnosis and forecasting of terminal area icing as well as high ice water content conditions typically associated with high-altitude engine ice crystal icing. She also managed the FAA's In-Cloud Icing and Large-drop Experiment (ICICLE) flight program and continues to lead post-campaign activities.
